

Why choose Natural Stone Veneer?

Black & Tan Mosaic

Character and durability. Naturally.

King Quarry's Natural Stone Veneer looks like real stone because it **is** real stone! Its authentic character and rich earthy colors create a design presence no other material quite replicates. Its beauty is consistent through and through. A surface nick or scratch reveals nothing but more of the same stone beneath - not concrete or a base material. Just as you'd expect from true stone, it resists weather and UV damage. What might surprise you is its affordability.

Less weight. Lower costs.

King Quarry's Natural Stone Veneer weighs less thanks to the thin cut. Lightweight pieces help reduce production, shipping and construction costs. In most cases, builders can skip those expensive load-bearing structures. Natural Stone Veneer installs without footings and adheres to concrete, plywood, paneling and even metal, all at a price that won't rock your budget.

Emerald Verde Mosaic

Real stone. Real easy. Really affordable.

Real stone creates a prestigious aura in its strength and rich colors. Whether you are looking for that certain color to match your existing décor or a natural blend of colors, our stone will compliment your projects. The designs range from our standard selections to the limit of your imagination. Commercial builders, architects, masons and homeowners alike will marvel at the endless possibilities.
